PROFILE

Motivated BCA student with a strong interest in full-stack web development and graphic design. Skilled in building modern websites and web applications using frontend and backend technologies. Experienced in creating personal projects to improve technical skills, problem solving ability, and understanding of realworld development workflows. Passionate about learning new technologies and seeking an internship or entry-level opportunity

PROJECTS

Full-Stack Web Applications

- Developed modern web applications using Next.js, React, TypeScript, Tailwind CSS, Prisma, and PostgreSQL.
- Implemented frontend interfaces, backend logic, database operations, and API integration.
- Improved skills in debugging, problem solving, and application development.

Personal Portfolio Website

- Designed and developed a personal portfolio website to showcase skills, projects, and contact information.
- Focused on responsive design and user experience.

UI/UX Design Projects

- Created website layouts, landing page designs, and digital graphics using Figma and Canva.
- Practiced design principles to create clean and user-friendly interfaces.
